

Harper Woods School District

Michigan, USA

These are exciting times for Harper Woods School District. A call and funding went out to create more "Interactive Classrooms" the school had very limited technology and required a complete outfit of interactive technology that would be easy to adapt by the faculty and students.

Creating the interactive classrooms would involve installing an interactive whiteboard (IWB), RF Tablet, projector, document camera, soundfield system, DVD/VCR's and student response systems. A tender was released, a point person in the curriculum department had experienced TeamBoard and Michigan dealer Digital Age Technologies (DAT) at the Regional Educational Media Center Association of Michigan (REMC) show and asked DAT and TeamBoard to present. Two other leading providers also were selected to present their solution. The technology committee was impressed with the intuitive nature of the board – floating toolbar, that no stylus was required, and that teachers could collaborate and work within any desired software which would allow for easy adoption versus being forced to work in a closed software environment, the decision was clear – Harper Woods standardized on TeamBoard.

Working with DAT, 74 classrooms were furnished with a - complete interactive classroom solution - 85" TeamBoard, WizTeach Software, TeamBoard Draw, TeamBoard RF Tablet, Epson 410W projector, TeachLogic Soundfield Systems, AverMedia Document Cameras, DVD/VCR's and Renaissance Learning Student Response Systems.

Selecting the best interactive technology was just the beginning; the next step was to ensure that the boards were utilized to their full potential. TeamBoard and DAT provided full training and utilization of the hardware and software for an easy implementation plan.

"The system allows our K-12 students to engage, they really like it (the classroom solution)....",
– Andy Hopkins, Harper Woods School District.

"The system allows our K-12 students to engage, they really like it (the classroom solution)....",
– Andy Hopkins, Harper Woods School District.

TeamBoard believes that technology provides the power for humans to achieve maximum result not inhibit them. TeamBoard is a global leader in creating, manufacturing and supplying cutting edge technology. By combining real-world application, thought leadership and "listening" to our users TeamBoard Solutions provide every instructor, presenter and audience from the Classroom to the Boardroom with the ability to provide more engaging sessions. – Easy does it!

We hope that this case study may provide you with insight into how TeamBoard solutions can be integrated into your own collaborative working space.
